

RELEANA Weight Loss

HCG is the active ingredient in RELEANA. HCG is a natural hormone which helps you burn stored fat to cause rapid weight loss. HCG activates the hypothalamus gland and causes your body to use your stored fat for energy, similar to the way your body uses calories you eat for energy. This medication is taken twice daily and it is done in conjunction with a low-calorie diet. You will work with the dietitian in the office and she will help you through each phase of the program to help you lose the weight and keep it off.

Initial Releana Visit Includes:

1 bottle of Releana (a 4 week supply)

1 hour initial visit with dietitian to get started with program

5 weigh ins (per pt.'s decision)

30 minute wrap-up appointment with dietitian when bottle is finished
